Job Title: Research Associate

Job Description:
The Institute for Media Innovation (IMI http://imi.ntu.edu.sg/) at Nanyang Technological University (NTU http://www.ntu.edu.sg/) invites applications for several research associate positions. The positions are to contribute to the research done in the Institute and mostly in virtual humans and mobile applications. IMI is an interdisciplinary Institute that works on interactive 3D visualizations, virtual humans and social robots.

Job Requirements:
As the job is to provide research support for an Institute focusing on Media research, and also for an immersive 3D system, applicants are required to have the following skills:

- Master degree in Computer Engineering on related areas.
- Experience in Computer Graphics.
- Passionate in working with 3D systems or in mobile applications.
- Excellent programming knowledge in C, C++.
- Experienced in application development.
- Apple iOS or Google Android platform would be appreciated.
- Good interpersonal and communication skill.

If you are interested to apply, please submit the following to imi-recruitment@ntu.edu.sg.

a. Curriculum vitae with photo
b. A brief research statement
c. Two names and contacts of recommendation

Please note that only shortlisted candidates will be notified. If you are successful, you will have a chance to work with researchers in one of Singapore’s top universities, Nanyang Technological University (NTU). As part of the team, you will help drive innovative research work and be involved in challenging projects. For more information about IMI, kindly visit our website http://imi.ntu.edu.sg.
