Come and hear from a variety of leading experts on HR and HR technology.

Register here for the event.

Data Certification Pathways: a purposeful set of 12 modules

The Data Certification Pathway consists of 12 modules that guide learners from basic to advanced data literacy. The modules are designed to help learners develop the skills and knowledge necessary to work with data effectively.

Some of the modules include:
- Introduction to Data Literacy
- Data Ethics and Privacy
- Data Visualization
- Data Analysis Techniques
- Data Management Fundamentals
- Advanced Analytics

These modules are available online and are self-paced, allowing learners to progress at their own pace.

OCBC Future Smart Learning Festival

The program is designed to help OCBC’s employees enhance their data science skills.

An Expert in Data Science at OCBC Bank reflects on his journey to becoming a data scientist.
